Awa Province: Naruto Whirlpools
Grades 9-12 Subject Area Ideas for Educators

TARGETED QUESTIONS

Use this video as a tool to spark classroom discussions. Encourage students to activate their prior knowledge and apply it to the conversation. Experiences with art can help students draw upon critical and creative thinking skills to practice analyzing, evaluating, and imagining across disciplines.

Ask Students:
“Think about Newton’s laws of motion. How might we figure out the velocity at which the whirlpools are moving, and how could this velocity be changed (either sped up or slowed down)?”

Ask Students:
“We learn from the video that Awa Province: Naruto Whirlpools is just one artwork in a series capturing Japan’s famous natural landmarks in provinces. Think about the modernization and industrialization of Japan in the 1800s. What might this artwork tell us about Japanese people’s view of modernization and industrialization at this time?”

Encourage students to allow the creative process to guide their responses to the video. Students’ final products will differ as they apply their own unique skills, knowledge, and interpretations to the challenge.

**Challenge Students:**
“Study Japanese Ukiyo-e prints and determine the characteristics of these artworks. Produce at least one print that reflects the characteristics that you identified.”

Linked to Standard: Grades 9-12. Foundations Visual Arts. Creating. 1. Generate and conceptualize artistic ideas and work. Create artistic ideas that reflect characteristics of different artistic movements from different cultures (e.g., study art by different individual 20th century Australian aboriginal artists and choose one as an inspiration for a composition.

**(F.V.Cr.01)**

**Challenge Students:**
“Complete a plan—including sketches—for a series of prints that illustrate at least three important natural landmarks in the USA. Consider how you will depict the characteristics of each landmark through intentional use of elements of art and principles of design.”

Linked to Standard: Grades 9-12. Proficient Visual Arts. Creating. 2. Organize and develop artistic ideas and work. Document a plan for an original large scale or multi-step art project (e.g., sketches for an art installation at a playground).

**(P.V.Cr.02)**

**Challenge Students:**
“Japanese ukiyo-e prints were internationally popular. Identify and analyze other artworks from the 1850s, especially those made in Europe. Find visual ways in which Japanese art, like the print *Awa Province: Naruto Whirlpools*, may have impacted and influenced European art. Explain to the class where and how you have identified influence from Japanese art in the artworks you’ve selected.”

Linked to Standard: Grade 9-12. World History II. Topic 3. The global effects of 19th century imperialism [WHII.T3]. 4. Analyze the cultural impact of colonial encounters and trade on people in Western nations, drawing on examples such as:

e. the influence of Japanese and African art on European art styles of impressionism and cubism.

**Challenge Students:**
“The power of water in motion can be harnessed to produce electricity. Using your knowledge about converting one form of energy to another, design a device that could work in the Naruto Whirlpools to generate hydroelectric power. If an artist created an artwork after the device was installed, how would their resulting artwork look different than the original print *Awa Province: Naruto Whirlpools*?”

Linked to Standard: Grade 9-12. Physics. Energy. HS-PS3-3. Design and evaluate a device that works within given constraints to convert one form of energy into another form of energy.

Linked to Standard: Grade 9-12. Speaking and Listening Standards [SL]. Presentation of Knowledge and Ideas. 4. Present information, findings, and supporting evidence, conveying a clear and distinct perspective, such that listeners can follow the line of reasoning, alternative or opposing perspectives are addressed, and the organization, development, vocabulary, substance, and style are appropriate to purpose, audience, and a range of formal and informal tasks.

**Challenge Students:**
“Choose and research a famous natural landmark. Give an oral presentation to the class to persuade people to visit the site, but include opposing viewpoints showing why one might argue not to visit the landmark (for example, negative social, economic, or environmental implications). In your presentation include supporting facts, details, and visual examples, like artworks.”

Linked to Standard: Grades 11-12. Speaking and Listening Standards [SL]. Presentation of Knowledge and Ideas. 4. Present information, findings, and supporting evidence, conveying a clear and distinct perspective, such that listeners can follow the line of reasoning, alternative or opposing perspectives are addressed, and the organization, development, vocabulary, substance, and style are appropriate to purpose, audience, and a range of formal and informal tasks.
